TECHNICAL SKILLS

- **Languages:** Python, C++, Java, C, JavaScript (ES6+), TypeScript, SQL, Bash, HTML, CSS
- **Backend and APIs:** FastAPI, Node.js, Express.js, REST API design, microservices, NATS messaging, Python/Qt desktop
- **Frontend and Data:** React, Vite, Tailwind CSS, PostgreSQL, Supabase, MySQL, MongoDB
- **Testing, CI and Infrastructure:** Jest, Playwright, Vitest, unit and integration testing, GitHub Actions, Docker, AWS, IBM Cloud, Render, Git, Linux, Grafana
- **Foundations:** Data structures and algorithms, object-oriented design, system design, distributed systems, Agile, Scrum

EXPERIENCE

IT Security Programmer (Enterprise IT, ITS)

Dec 2025 – Present

University of California, San Diego | San Diego, CA

- Designed and implemented REST web services and application components for enterprise information security projects, authoring 20+ automated test cases and documentation for the team.
- Cut manual review effort by 30% with SQL queries and matching algorithms that reconcile records across legacy and modern enterprise data systems.
- Conducted authorized penetration testing on an academic AI compute environment under defined scope, reporting configuration and access control gaps with remediation guidance.

Software Engineering Intern

Jun 2026 – Sep 2026

Lumulus Technologies | San Diego, CA

- Delivered a Windows desktop application in Python/Qt that configures and validates USB-connected hardware devices, with read/write and data-integrity logic verified against published industry specifications.
- Extended an existing internal platform inside a full-time engineering codebase, contributing testing, validation, and documentation with every feature.

Web Development Intern

Jun 2025 – Oct 2025

NutrifitWorld | Dallas, TX

- Drove a 40% cut in manual operations and a 25% lift in client engagement with a GoHighLevel platform extended with custom JavaScript and CSS, integrating CRM and scheduling.
- Lifted lead conversion by 20% by replacing ad hoc reporting with analytics dashboards and automated reporting pipelines.

PROJECTS

WatchTower, Production Observability Platform

May 2026

JavaScript, Node.js, Supabase, PostgreSQL, Clerk, Jest, Playwright, Render

- Led an 11-engineer team as Team Leader, Scrum Master and backend tech lead, owning system design across a browser SDK, Node.js ingest API, PostgreSQL persistence and a real-time dashboard.
- Shipped a deployed backend with a live SDK test app and established the Jest and Playwright CI pipeline gating every merge, delivering a working platform rather than a prototype.

TravelAGNTCY, Multi-Agent Travel Planner

Jan 2026

Python, FastAPI, LangGraph, React, TypeScript, Docker, NATS, Grafana

- Architected a distributed planner with a LangGraph supervisor orchestrating specialised agents across 6+ Dockerized microservices on NATS, served over FastAPI to a React and TypeScript interface.
- Reduced inter-service latency by roughly 40% and made agent-level failures traceable through structured logging with Grafana and ClickHouse dashboards.

AI Chat Assistant

Jul 2025

Node.js, Express.js, JavaScript, JSON, IBM Cloud Functions

- Deployed a Node.js and Express backend with REST routes and JSON-driven dialogue workflows on IBM Cloud Functions, sustaining 90%+ response accuracy across 150+ test conversations.
- Accelerated average response time by 15% under concurrent load by tuning server-side request handling.

EDUCATION

Bachelor of Science in Computer Science

Anticipated Jun 2027

University of California, San Diego | San Diego, CA

Relevant Coursework: Advanced Data Structures, Software Engineering, Network Security, Cryptography

Associate of Science in Computer Science

Aug 2023 – May 2025

Irvine Valley College | Irvine, CA

Relevant Coursework: Programming, Data Structures, Discrete Mathematics, Linear Algebra, Calculus I-III

CERTIFICATIONS AND LEADERSHIP

- **Certifications, IBM SkillsBuild (2025):** Code Generation and Optimization Using IBM Granite, Data Classification and Summarization Using IBM Granite, Cybersecurity Fundamentals
- **Founder and President, AI Club at Irvine Valley College (2024–2025):** Founded the college's first AI club and grew it to 150+ members, ran 5+ technical workshops averaging 30 attendees, and secured \$2,000 in sponsorships.
